# Journey Sharing

26th, May 2017

Orazio Angrisani Fabio Cipriani Danilo Persico

## What is our project about?

Augmented reality
Social networking
Face recognition

# Why?

Breakthrough technology

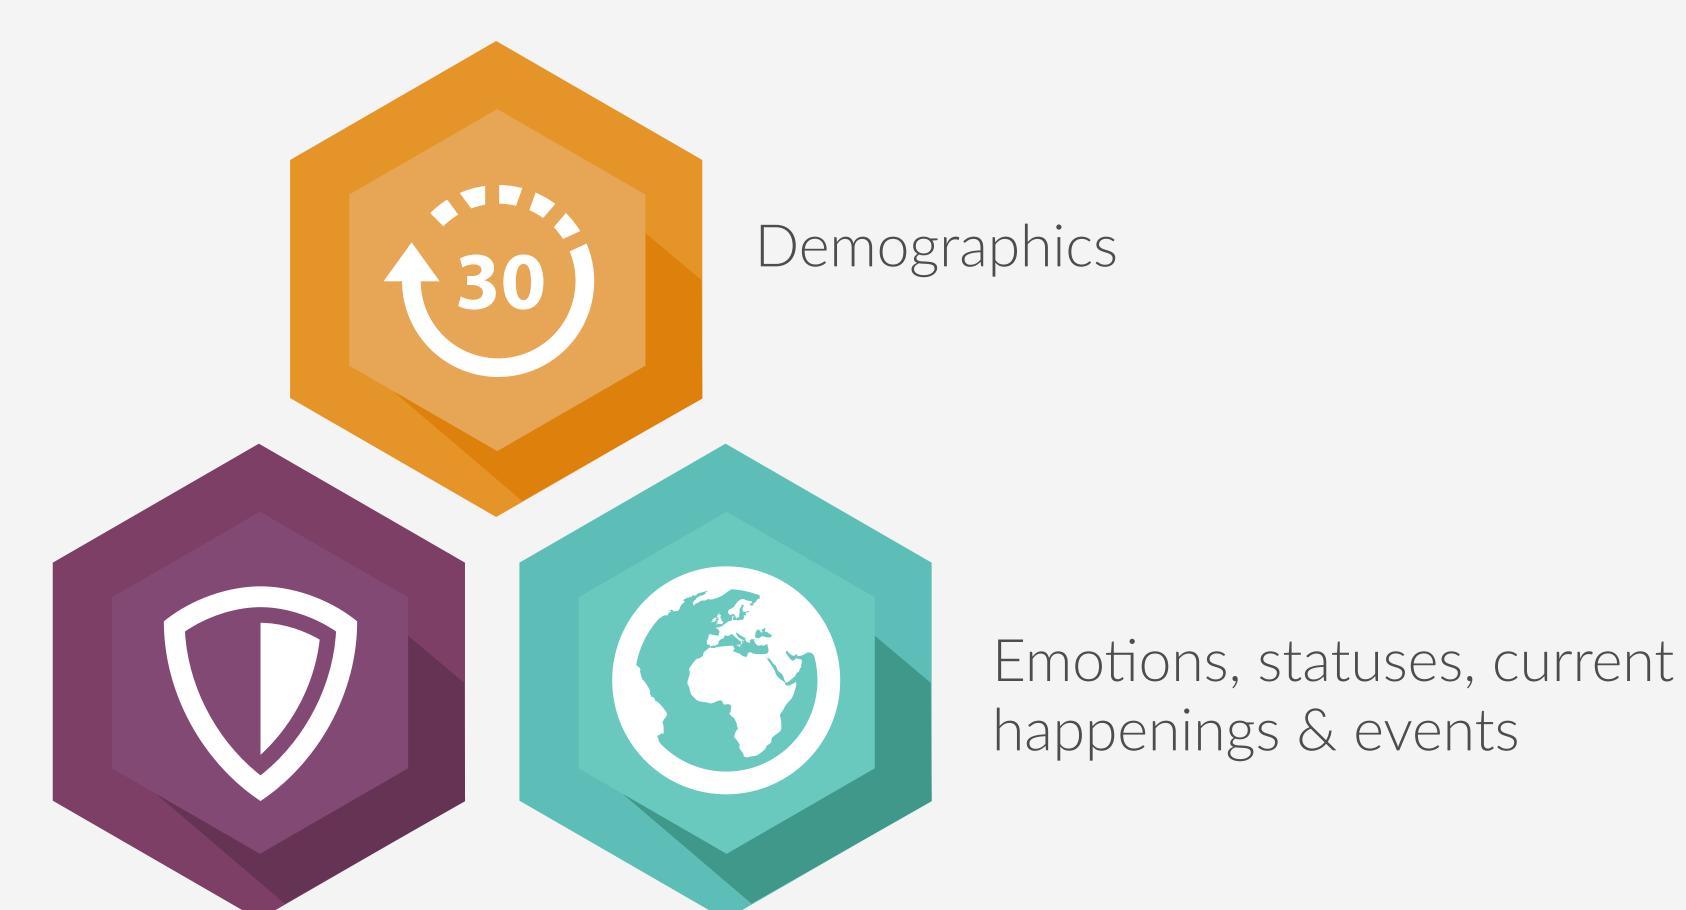

Revolutionary way of sharing information

Fun and engaging to use

## Which data?

Occupation, Education & interests

## Project Main Goals

Create the most engaging way to best interact with people

Find the greatest way to access information

Benefit the use of Technologies like Augmented Reality and Facial Recognition

## Legal issues

### Privacy invasion and identity theft

### Solution:

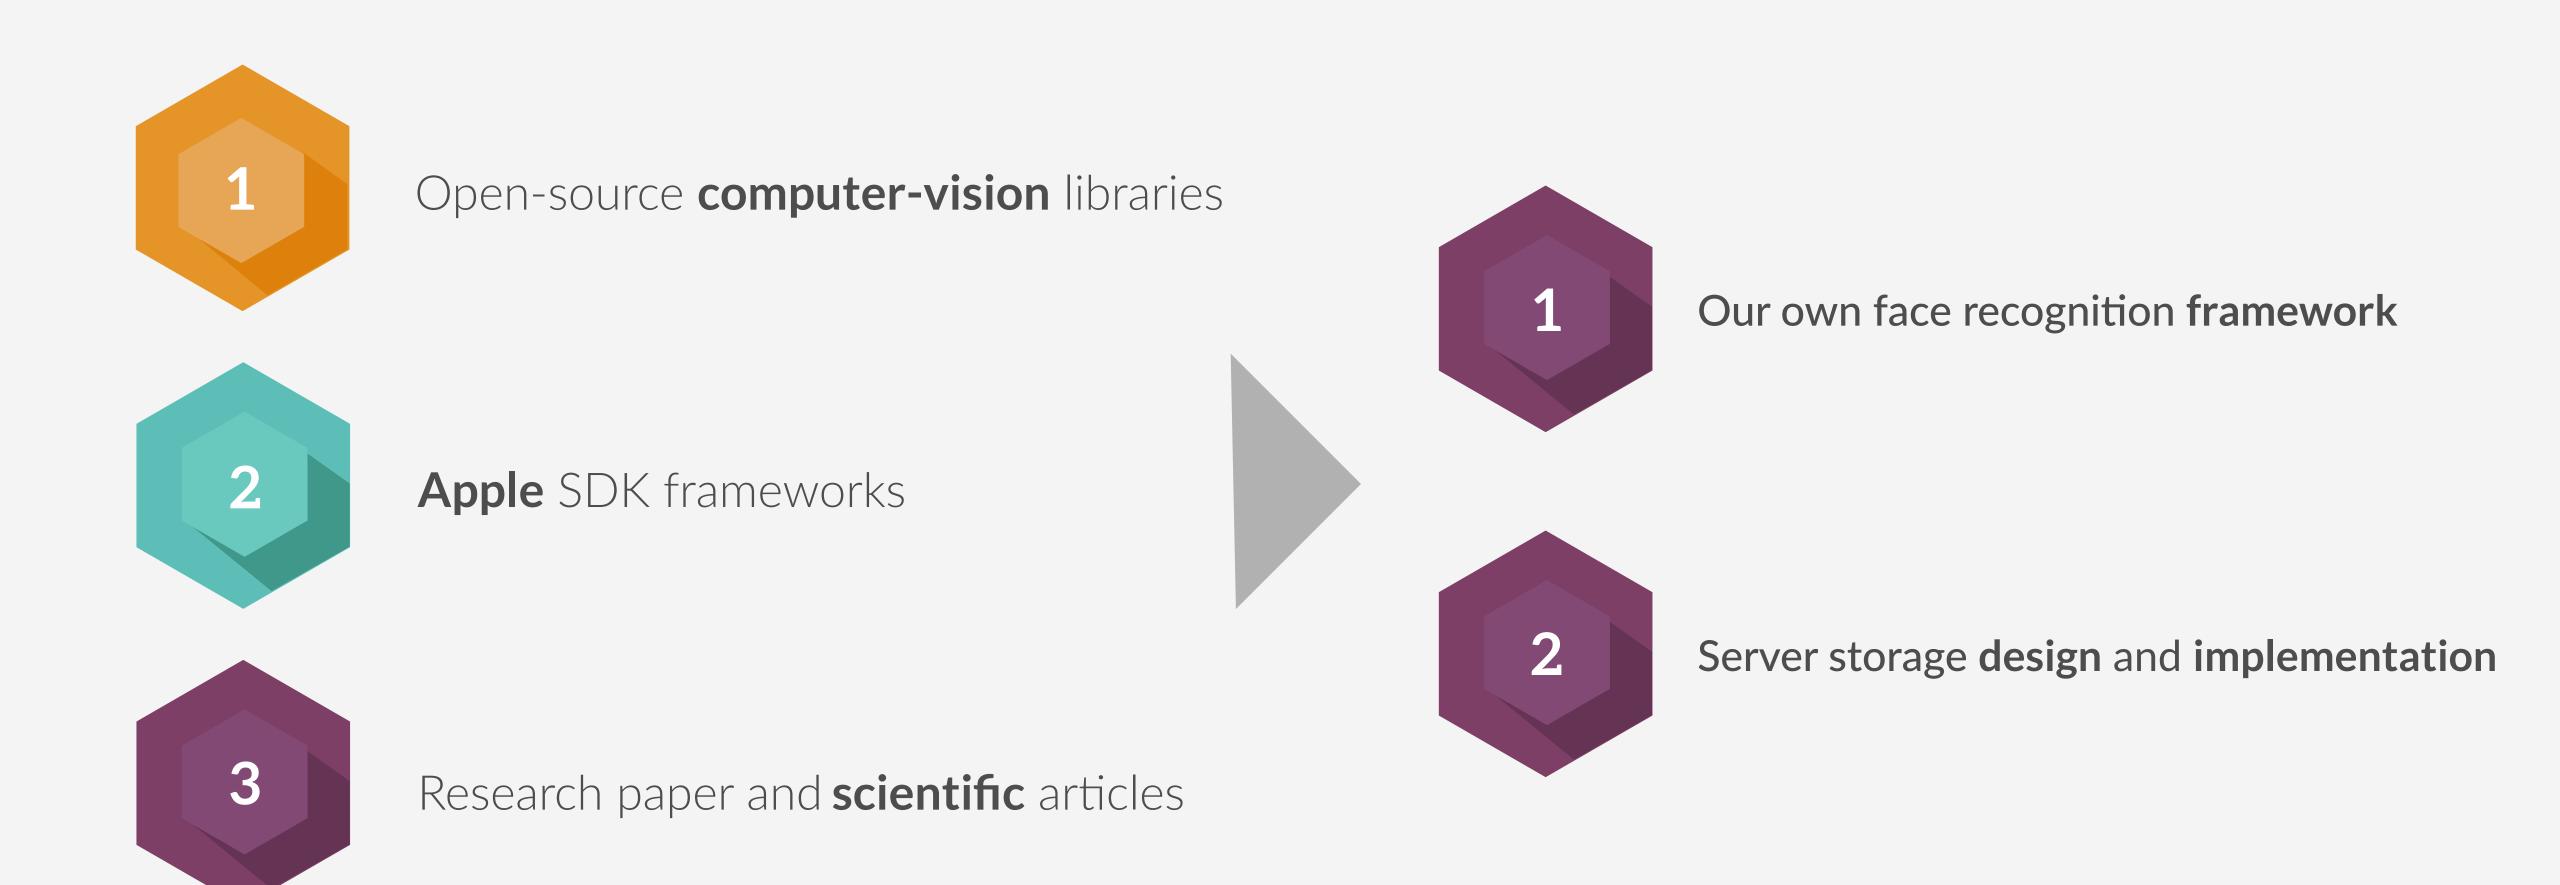

Users will have to be registered first

Data will be stored in the **database**, no sensible data though

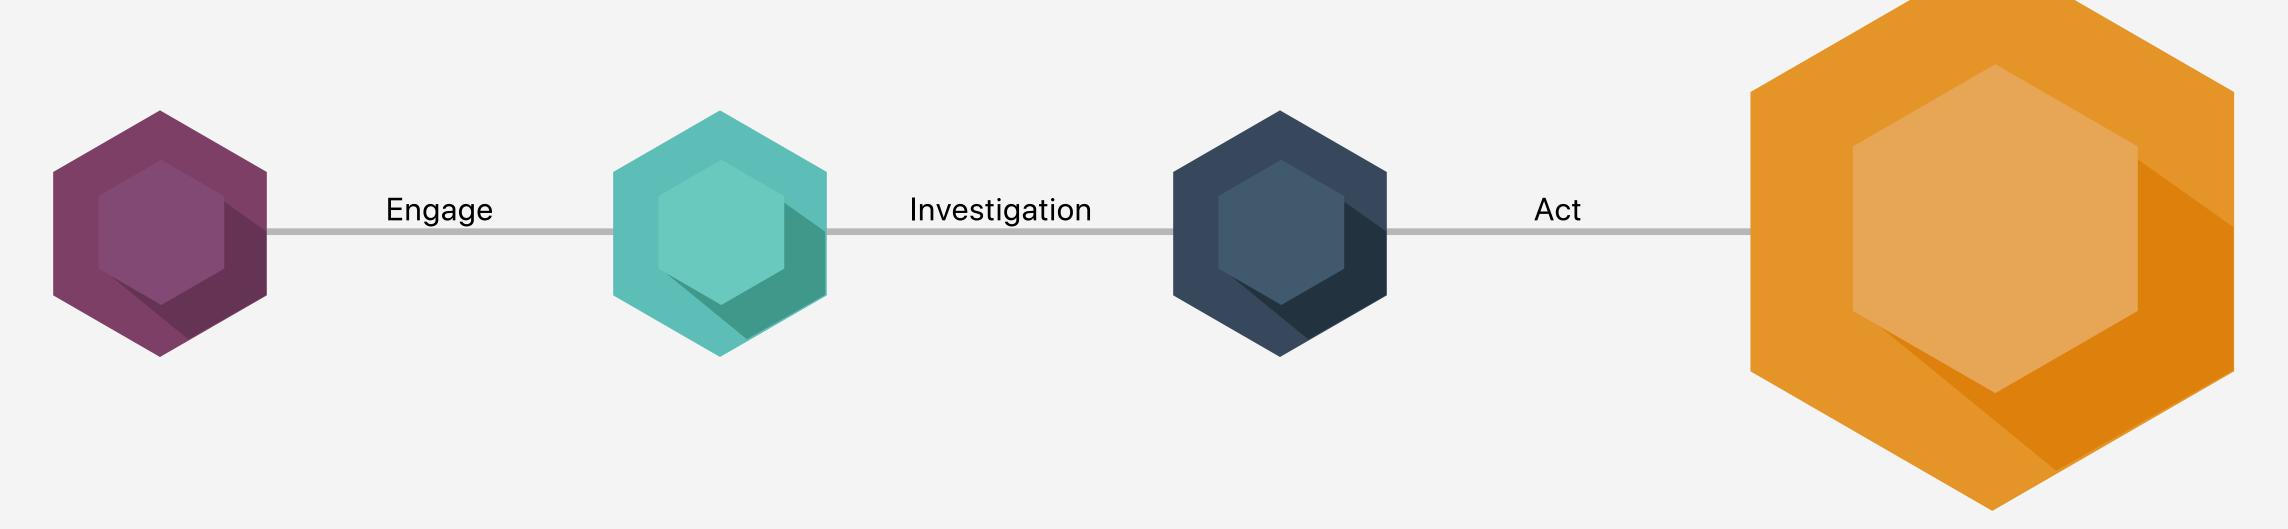

Users will **freely choose** which information to share with others and which users cannot have access to their profile

### Technical Resources

## Project timeline

#### **Project start**

19th April

Team-building Brainstorming Market Research

#### Research

24th April

Competitor Analysis Lean Persona VPC Surveys Questionings Data gathering

#### 1st Sprint

2nd May - 19th May

MVP

UI Sketches & Wireframes **Business Model** Surveys Project Charter Brand Making Marketing Initiative

Algorithm version 1.0

2nd Sprint

22nd May - 3rd June

User Interface improvement Working prototype **Business Plan** Framework creation

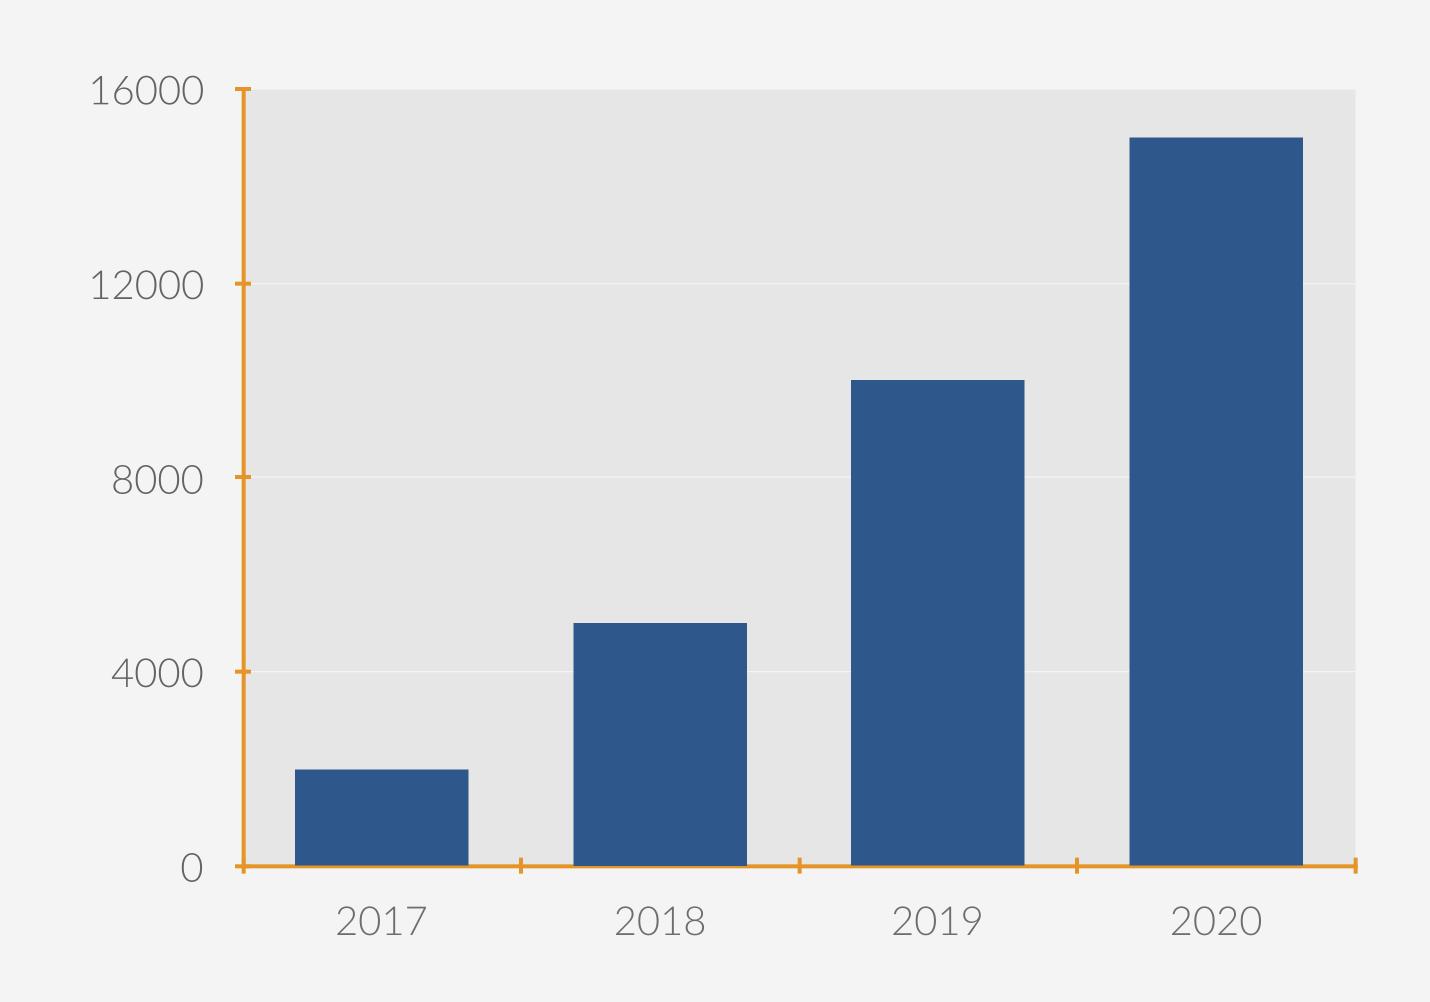

## How we'll make money?

By gaining critical mass of users first

Monetize it

Return-on-Investment(ROI)

Exit Strategy

## Features

Face-recognizer

Point to a person will then show information about them and possible connect with her/him

Info-bearer

Freely choose your information to be shared in the screen with other users

Social Reveal

See their social life by exploring their social networks
